

Research

UND obtained more than \$209 million in total external awards in FY2021, including over \$127 million in research awards. In FY2020, UND's research expenditures totaled \$111.7 million. More than \$44.1 million of those expenditures were from federal sources including the Department of Energy, National Institutes of Health, National Science Foundation and Department of Defense among others. UND research expenditures supported the training of hundreds of undergraduate students and approximately 250 graduate students in research projects.

NDUS Report on Economic Impact

As the chief opportunity engine for North Dakota and North Dakotans, the University of North Dakota is the state's most comprehensive, research-intensive university and the primary center for professional education and training. It is one of approximately 55 public universities in the nation with accredited professional schools of both law and medicine. According to a 2019 study, UND's economic impact on the state and region is \$1.7 billion. Levels of business activity resulting from UND expenditures supported 2,688 secondary (indirect and induced) jobs in FY2019.

UND also exerts an economic impact through its students and alumni. Seventy-eight percent of family medicine physicians practicing in North Dakota either graduated from the UND School of Medicine & Health Sciences or completed an in-state residency.* Additionally, UND has educated a significant number of the engineers and oil and gas experts working in the energy industry that is so critical to the state's economic health.
